US Model PS2500

Hot Stamping and Heat Transfer Machine

The United Silicone's PS2500 Roll-On Hot Stamping machine is used for peripheral application of heat transfer decals or decorative foils to cylindrical or tapered parts.

State-of-the-Art Controller

- Operator-friendly graphical display for rapid parameter adjustment
- Stores multiple job parameters for instant recall
- Precise digital head temperature control
- Networking capability to manage several decorating machines from a single location

Stable Head Control

- Improved head guide system for accurate positioning throughout the head stroke
- Safe, quiet, smooth cycling
- Convenient, accurate stroke length adjustment for rapid setup
- Front panel speed controls to set ideal head travel speeds, stamping pressure, and foil stripping condition
- Angular adjustments on head

Precision Foil Advance

- Constant torque for smooth advance
- Accurate, repeatable cycling for minimal foil waste

As your one source for decorating equipment, tooling and accessories, United Silicone can deliver turnkey hot stamping and heat transfer systems that are designed for your specifications. We also offer the industry's most complete line of tooling and supplies, designed to optimize the performance of your decorating equipment.
